

IS Interest Account Fund

Deposits and Government

Objective and investment policy

IS Interest Account Fund is an Alternative Investment Fund for Retail Investors (AIF for retail) that invests in financial institution deposits, bills and securities as well as bills and short-term securities issued or guaranteed by the Icelandic Government. High proportion of deposits in the Fund's investment strategy minimizes fluctuations.

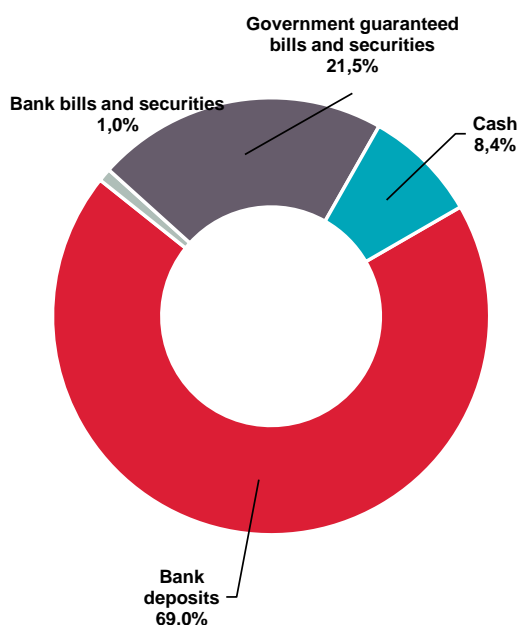

The estimated duration of the fund is 0-180 days and each individual investment in financial institution (deposit, bills and bonds) can have no longer maturity than 370 days on the day of investment. No duration restrictions are on individual investments issued by the Icelandic Government.

The fund is authorized to use repurchase agreements to hedge against unexpected outflow. The Fund is an Alternative Investment Fund and its investment authorizations are based on Act no. 45/2020.

Risk and disclaimer

Information in accordance with Article 47 of Act no. 45/2020 on Alternative investment Fund Management companies

Íslandssjóðir's risk management conducts regular stress tests for Íslandssjóðir's alternative investment funds. Stress tests assess the impact of different scenarios on funds' portfolios under normal and exceptional liquidity conditions.

The risk and reward indicator demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. Risk factors that affect the value of a holding in the fund but the risk indicator does not cover are credit risk, liquidity risk, counterparty risk and operational risk.

Risk management monitors the funds' investment on a daily basis and whether investments are within risk limits. If a fund exceeds limits, e.g. due to market conditions or flow in or out of the fund, the fund manager is notified without delay and appropriate measures are taken. In the event of a violation of law requirements, it is reported to the Financial Supervisory Authority. Various financial risks are always related to investment activities, such as the risk of no yield or the risk of losing the capital invested. It should further be noted that international investing includes risks related to political and economic uncertainties as well as currency risk. **Past performance does not indicate nor guarantee future performance of an investment.** The Fund seeks to diversify its investments and minimise fluctuations on the price of the Fund as a result of market situation. Investing in the Fund does involve risk. The Fund's price can decrease as well as increase. The price and return of the Fund reflects market fluctuations, if interest rates rise, bonds at a fixed income rate drop in value and bonds with long maturities drop more than short-term bonds, based on the same changes in yield. Investment in a mutual fund is, however, less risky than investments in individual securities. Investors should bear in mind that investing in a mutual fund does involve risk, the value of assets in a fund may at some point be lower than earlier point during the period of ownership.

Each investor's investment objectives and financial situation is different. Before making an investment decision, it is important to seek expert advice and familiarise oneself with the investment market and different investment alternatives. Investors are encouraged to familiarise themselves with the IS Interest Account Fund prospectus, especially regarding risk. The funds prospectus and simplified prospectus are available on www.isfunds.is
